Instructions for completing the Learning Contract (LC) sections of this document:

Students complete the “LC activities,” in collaboration with the field instructor. “LC activities” are the learning opportunities (e.g., assignments, processes, tasks) in the field setting by which progress in the competencies occurs.

There are four dimensions underlying practice behaviors: values; knowledge; skills; and, cognitive and affective processes.

- **Values:** values and beliefs of the profession, codified in the NASW Code of Ethics
- **Knowledge:** academic and experiential
- **Skills:** demonstrated ability to practice social work interventions (that integrate values, knowledge, and cognitive and affective processes)
- **Cognitive and Affective Processes** [as defined in the CSWE 2015 EPAS Glossary]
 - Critical Thinking: “an intellectual, disciplined process of conceptualizing, analyzing, evaluating and synthesizing multiple sources of information generated by observation, reflection and reasoning”
 - Affective reactions: “the way in which our emotions influence our thinking and subsequently our behavior”
 - Judgment: “the capacity to perceive and discern multiple sources to form an opinion

Each learning activity in this document has a code letter indicating the corresponding dimension: **V** = Value; **K** = Knowledge; **S** = Skills; **CAP** = Cognitive and Affective Processes.

The learning activities should connect with at least one dimensions within each competency, and all dimensions must be accounted for in the LC activities.

Each student’s learning activities will be unique to her/his/their field setting, focus, interests, and opportunities. Include information in each activity that demonstrates how the activity will occur in your particular agency. The LC is a “live” document that can be revised over time as activities shift and opportunities arise.

Remote Tasks: Please note that the remote tasks section is to be used if the social work department, student, or agency has limited or no capacity for face-to-face field placement and completion of in-person activities toward demonstrating competencies. If this were to occur, a student may begin using remote field activities only after consultation with their field instructor and seminar instructor.

Evaluation of student performance:

Prior to the midterm assessment please complete the Midterm Evaluation referring to the rating scale below for each behavior. Prior to the end of the semester please complete the Final Evaluation for each behavior using the rating scale listed below. Each behavior should be rated holistically, with attention to the quality of the completion of competency activities in the learning contract. Midterm ratings are intended as a method of structuring feedback and focusing attention on challenging aspects of field for the student. A student may receive an NA at midterm only if the activities for a particular behavior will be completed in the second half of the semester. An NA will not be permitted in the Final Evaluation. Please contact the Seminar Instructor if you have questions or concerns about a particular behavior and subsequent activities.

A rating scale for this form ranges from the need for significant improvement to exceptional mastery, as described below:

1. **Not Competent** - Student **does not demonstrate** command of essential knowledge and/or does not demonstrate application of knowledge to practice. The student is practicing well below a satisfactory level.
2. **Limited Competence** - Student demonstrates **limited and/or inconsistent** understanding of essential knowledge and/or the application of knowledge to practice. More than the usual amount of supervision may be required. There is significant concern about the student's knowledge and/or practice level. A remediation plan is required.
3. **Emerging Competence** - Student understands the skill and demonstrates a **beginning or growing ability** to apply knowledge to practice. The student predominantly functions semi independently with appropriate supervision and support.
4. **Competence** - Student consistently understands the skill and its applicability and **effectively and routinely** demonstrates the skills in practice. The student shows an ability to function independently with appropriate supervision and support.
5. **Superior Competence** - Student adapts the skill to the setting and demonstrates **mastery of the skill in novel, diverse, and difficult contexts.**

Competencies and Learning Contract (LC)

Competency 1 – Demonstrate ethical and professional behavior

Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession’s history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice.

Competency 2 – Engage diversity and difference in practice

Social workers understand how diversity and difference characterize and shape the human experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person’s life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture’s structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power.

Competency 4 – Engage in practice-informed research and research-informed practice.

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice.

Competency 6 – Engage with individuals, families, groups, organizations, and communities.

Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. [SEP] Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate.

Competency 8 – Intervene with individuals, families, groups, organizations, and communities.

Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration.
